Due to the design, the LED strips are not interchangeable, as they are firmly attached to carrier profiles such as e.g. aluminum profiles and must be glued. In this way, we guarantee a consistently long service life for our lights. We reserve the right to make technical changes to the model and dimensions! Models protected by law! Due to different designs and functions, the dimensions specified on the order confirmation may vary slightly in individual cases.

Tips for long-term enjoyment of our natural wood furniture & leather covers

- All surfaces should be treated with care.
- Do not place any sharp-edged, hot or damp objects on the wooden surfaces.
- Spilled liquids should be cleaned up quickly before moisture can soak into the wood.
- Clean the surfaces with a dry or slightly damp soft cloth.
- Then rub the surfaces dry. No moisture should remain on the surface.
- Please do not use cleaning agents.

For later surface refreshment, we recommend our specially developed care products. Regular application of our care milk and leather care products cleans, cares for and protects your wood and leather surfaces and thus ensures a longer lifespan for your Hartmann furniture.

Please note that the degree of gloss may change slightly after treatment.

Care set for wood

The milk gently removes dust and dirt without clogging the pores of the wood. It protects and cares in one step.

You can also find all the information about caring for your products here:

Care set for leather

The care set for pigmented smooth leather with the mild leather cleaner and the leather protector cleans, protects and cares for all pigmented smooth leather for cars and furniture. Pigmented smooth leathers are the most commonly used leathers for car and furniture leather.

AUSGEZEICHNET

NACHHALTIG

SUSTAINABLE ENERGY

Heating with wood residues from production saves 300,000 liters of heating oil each year, thus avoiding around 950 tons of CO₂. 3,800 PV modules on the roofs of the production halls generate 1,080,000 kWh of electricity per year. This avoids over 700 tons of CO₂ emissions every year.

SUSTAINABLE RAW MATERIALS

The wood for our furniture comes 100% from sustainably managed forestry. A new one is planted for every tree used for production. That corresponds to around 7,000 trees a year.

SUSTAINABLE WATER MANAGEMENT

The construction of a circular system is planned for sustainable groundwater extraction: rainwater will be collected over a large area and fed back into the groundwater via a trickle.

SUSTAINABLE CORPORATE STRUCTURES

As a family-run company, we have been producing in Beelen for 110 years and will soon be in the fourth generation. Our employees have been with the company for an average of 26 years.
